Energy Performance Certificate (EPC)

Dwellings

Scotland

27 BONALY GARDENS, COLINTON, EDINBURGH, EH13 0EX

Dwelling type: Detached house
Date of assessment: 12 August 2025
Date of certificate: 14 August 2025

Total floor area: 179 m²

Primary Energy Indicator: 227 kWh/m²/year

Reference number: 4515-2228-8200-0942-0292 **Type of assessment:** RdSAP, existing dwelling

Approved Organisation: Elmhurst

Main heating and fuel: Boiler and radiators, mains

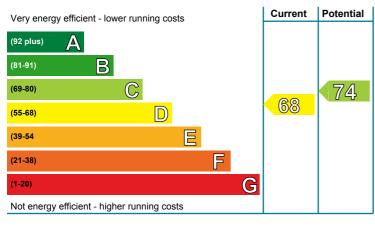

gas

You can use this document to:

- Compare current ratings of properties to see which are more energy efficient and environmentally friendly
- Find out how to save energy and money and also reduce CO₂ emissions by improving your home

Estimated energy costs for your home for 3 years*	£7,704	See your recommendations
Over 3 years you could save*	£918	report for more information

* based upon the cost of energy for heating, hot water, lighting and ventilation, calculated using standard assumptions

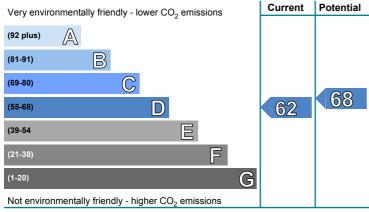

Energy Efficiency Rating

This graph shows the current efficiency of your home, taking into account both energy efficiency and fuel costs. The higher this rating, the lower your fuel bills are likely to be.

Your current rating is **band D (68)**. The average rating for EPCs in Scotland is **band D (61)**.

The potential rating shows the effect of undertaking all of the improvement measures listed within your recommendations report.

Environmental Impact (CO₂) Rating

This graph shows the effect of your home on the environment in terms of carbon dioxide (CO_2) emissions. The higher the rating, the less impact it has on the environment.

Your current rating is band D (62)

The potential rating shows the effect of undertaking all of the improvement measures listed within your recommendations report.

Top actions you can take to save money and make your home more efficient

Recommended measures	Indicative cost	Typical savings over 3 years
1 Floor insulation (suspended floor)	£5,000 - £10,000	£462.00
2 Hot water cylinder thermostat	£130 - £180	£459.00
3 Solar photovoltaic (PV) panels	£8,000 - £10,000	£720.00

A full list of recommended improvement measures for your home, together with more information on potential cost and savings and advice to help you carry out improvements can be found in your recommendations report.

To find out more about the recommended measures and other actions you could take today to stop wasting energy and money, visit greenerscotland.org or contact Home Energy Scotland on 0808 808 2282.

THIS PAGE IS THE ENERGY PERFORMANCE CERTIFICATE WHICH MUST BE AFFIXED TO THE DWELLING AND NOT BE REMOVED UNLESS IT IS REPLACED WITH AN UPDATED CERTIFICATE

Summary of the energy performance related features of this home

This table sets out the results of the survey which lists the current energy-related features of this home. Each element is assessed by the national calculation methodology; 1 star = very poor (least efficient), 2 stars = poor, 3 stars = average, 4 stars = good and 5 stars = very good (most efficient). The assessment does not take into consideration the condition of an element and how well it is working. 'Assumed' means that the insulation could not be inspected and an assumption has been made in the methodology, based on age and type of construction.

Element	Description	Energy Efficiency	Environmental
Walls	Cavity wall, filled cavity	★★★★☆	★★★★☆
Roof	Pitched, 100 mm loft insulation Flat, insulated Pitched, insulated (assumed)	**** **** ***	***** *****
Floor	Suspended, no insulation (assumed) Suspended, limited insulation (assumed) To unheated space, limited insulation (assumed)	_ _ _	_ _ _
Windows	Fully double glazed	***	***
Main heating	Boiler and radiators, mains gas	★★★★ ☆	★★★★☆
Main heating controls	Programmer, room thermostat and TRVs	★★★★ ☆	★★★★ ☆
Secondary heating	None	_	_
Hot water	From main system, no cylinder thermostat	***	***
Lighting	Good lighting efficiency	★★★★ ☆	★★★★ ☆

The energy efficiency rating of your home

Your Energy Efficiency Rating is calculated using the standard UK methodology, RdSAP. This calculates energy used for heating, hot water, lighting and ventilation and then applies fuel costs to that energy use to give an overall rating for your home. The rating is given on a scale of 1 to 100. Other than the cost of fuel for electrical appliances and for cooking, a building with a rating of 100 would cost almost nothing to run.

As we all use our homes in different ways, the energy rating is calculated using standard occupancy assumptions which may be different from the way you use it. The rating also uses national weather information to allow comparison between buildings in different parts of Scotland. However, to make information more relevant to your home, local weather data is used to calculate your energy use, CO₂ emissions, running costs and the savings possible from making improvements.

The impact of your home on the environment

One of the biggest contributors to global warming is carbon dioxide. The energy we use for heating, lighting and power in our homes produces over a quarter of the UK's carbon dioxide emissions. Different fuels produce different amounts of carbon dioxide for every kilowatt hour (kWh) of energy used. The Environmental Impact Rating of your home is calculated by applying these 'carbon factors' for the fuels you use to your overall energy use.

The calculated emissions for your home are 42 kg $CO_2/m^2/yr$.

The average Scottish household produces about 6 tonnes of carbon dioxide every year. Based on this assessment, heating and lighting this home currently produces approximately 7.5 tonnes of carbon dioxide every year. Adopting recommendations in this report can reduce emissions and protect the environment. If you were to install all of these recommendations this could reduce emissions by 1.1 tonnes per year. You could reduce emissions even more by switching to renewable energy sources.

Estimated energy costs for this home

	Current energy costs	Potential energy costs	Potential future savings
Heating	£6,396 over 3 years	£5,724 over 3 years	
Hot water	£1,005 over 3 years	£759 over 3 years	You could
Lighting	£303 over 3 years	£303 over 3 years	save £918
Tota	s £7,704	£6,786	over 3 years

These figures show how much the average household would spend in this property for heating, lighting and hot water. This excludes energy use for running appliances such as TVs, computers and cookers, and the benefits of any electricity generated by this home (for example, from photovoltaic panels). The potential savings in energy costs show the effect of undertaking all of the recommended measures listed below.

Recommendations for improvement

The measures below will improve the energy and environmental performance of this dwelling. The performance ratings after improvements listed below are cumulative; that is, they assume the improvements have been installed in the order that they appear in the table. Further information about the recommended measures and other simple actions to take today to save money is available from the Home Energy Scotland hotline which can be contacted on 0808 808 2282. Before carrying out work, make sure that the appropriate permissions are obtained, where necessary. This may include permission from a landlord (if you are a tenant) or the need to get a Building Warrant for certain types of work.

Da	la Back		Typical saving	Rating after improvement	
RE	ecommended measures	Indicative cost	per year	Energy	Environment
1	Floor insulation (suspended floor)	£5,000 - £10,000	£154	C 70	D 64
2	Hot water cylinder thermostat	£130 - £180	£153	C 71	D 67
3	Solar photovoltaic panels, 2.5 kWp	£8,000 - £10,000	£240	C 74	D 68

Choosing the right improvement package

For free and impartial advice on choosing suitable measures for your property, contact the Home Energy Scotland hotline on 0808 808 2282 or go to www.greenerscotland.org.

About the recommended measures to improve your home's performance rating

This section offers additional information and advice on the recommended improvement measures for your home

1 Floor insulation (suspended floor)

Insulation of a floor will significantly reduce heat loss; this will improve levels of comfort, reduce energy use and lower fuel bills. Suspended floors can often be insulated from below but must have adequate ventilation to prevent dampness; seek advice about this if unsure. Further information about floor insulation is available from many sources including www.energysavingtrust.org.uk/scotland/Insulation/Floor-insulation. Building regulations generally apply to this work so it is best to check with your local authority building standards department.

2 Cylinder thermostat

A hot water cylinder thermostat enables the boiler to switch off when the water in the cylinder reaches the required temperature; this minimises the amount of energy that is used and lowers fuel bills. The thermostat is a temperature sensor that sends a signal to the boiler when the required temperature is reached. To be fully effective it needs to be sited in the correct position and hard wired in place, so it should be installed by a competent plumber or heating engineer. Building regulations apply to this work, so it is best to check with your local authority building standards department whether a building warrant will be required.

3 Solar photovoltaic (PV) panels

A solar PV system is one which converts light directly into electricity via panels placed on the roof with no waste and no emissions. This electricity is used throughout the home in the same way as the electricity purchased from an energy supplier. Planning permission might be required, building regulations generally apply to this work and a building warrant may be required, so it is best to check with your local authority. The assessment does not include the effect of any Feed-in Tariff which could appreciably increase the savings that are shown on this EPC for solar photovoltaic panels, provided that both the product and the installer are certified by the Microgeneration Certification Scheme (or equivalent). Details of local MCS installers are available at www.microgenerationcertification.org.

Low and zero carbon energy sources

Low and zero carbon (LZC) energy sources are sources of energy that release either very little or no carbon dioxide into the atmosphere when they are used. Installing these sources may help reduce energy bills as well as cutting carbon.

LZC energy sources present: There are none provided for this home

Your home's heat demand

In this section, you can see how much energy you might need to heat your home and provide hot water. These are estimates showing how an average household uses energy. These estimates may not reflect your actual energy use, which could be higher or lower. You might spend more money on heating and hot water if your house is less energy efficient. The table below shows the potential benefit of having your loft and walls insulated. Visit https://energysavingtrust.org.uk/energy-at-home for more information.

Heat demand	Existing dwelling	Impact of loft insulation	Impact of cavity wall insulation	Impact of solid wall insulation
Space heating (kWh per year)	25,212.89	N/A	N/A	N/A
Water heating (kWh per year)	4,100.35			

About this document

This Recommendations Report and the accompanying Energy Performance Certificate are valid for a maximum of ten years. These documents cease to be valid where superseded by a more recent assessment of the same building carried out by a member of an Approved Organisation.

The Energy Performance Certificate and this Recommendations Report for this building were produced following an energy assessment undertaken by an assessor accredited by Elmhurst (www.elmhurstenergy.co.uk), an Approved Organisation Appointed by Scottish Ministers. The certificate has been produced under the Energy Performance of Buildings (Scotland) Regulations 2008 from data lodged to the Scottish EPC register. You can verify the validity of this document by visiting www.scottishepcregister.org.uk and entering the report reference number (RRN) printed at the top of this page.

Edinburgh EH3 8HA 0131 225 1234

Phone number: 0131 225 1234 Email address: edinburgh@shepherd.co.uk

Related party disclosure: No related party

If you have any concerns regarding the content of this report or the service provided by your assessor you should in the first instance raise these matters with your assessor and with the Approved Organisation to which they belong. All Approved Organisations are required to publish their complaints and disciplinary procedures and details can be found online at the web address given above.

Use of this energy performance information

Once lodged by your EPC assessor, this Energy Performance Certificate and Recommendations Report are available to view online at www.scottishepcregister.org.uk, with the facility to search for any single record by entering the property address. This gives everyone access to any current, valid EPC except where a property has a Green Deal Plan, in which case the report reference number (RRN) must first be provided. The energy performance data in these documents, together with other building information gathered during the assessment is held on the Scottish EPC Register and is available to authorised recipients, including organisations delivering energy efficiency and carbon reduction initiatives on behalf of the Scottish and UK governments. A range of data from all assessments undertaken in Scotland is also published periodically by the Scottish Government. Further information on these matters and on Energy Performance Certificates in general, can be found at www.gov.scot/epc.

Advice and support to improve this property

There is support available, which could help you carry out some of the improvements recommended for this property on page 3 and stop wasting energy and money. For more information, visit greenerscotland.org or contact Home Energy Scotland on 0808 808 2282.

Home Energy Scotland's independent and expert advisors can offer free and impartial advice on all aspects of energy efficiency, renewable energy and more.

PART 1 - GENERAL

1.1 THE SURVEYORS

The Seller has engaged the Surveyors to provide the Single Survey Report and a generic Mortgage Valuation Report for Lending Purposes. The Seller has also engaged the Surveyors to provide an Energy Report in the format prescribed by the accredited Energy Company.

The Surveyors are authorised to provide a transcript or retype of the generic Mortgage Valuation Report on to Lender specific pro-forma. Transcript reports are commonly requested by Brokers and Lenders. The transcript report will be in the format required by the Lender but will contain the same information, inspection date and valuation figure as the generic Mortgage Valuation Report and the Single Survey. The Surveyors will decline any transcript request which requires the provision of information additional to the information in the Report and the generic Mortgage Valuation Report until the Seller has conditionally accepted an offer to purchase made in writing.

Once the Seller has conditionally accepted an offer to purchase made in writing, the Purchaser's lender or conveyancer may request that the Surveyors provide general comment on standard appropriate supplementary documentation. In the event of a significant amount of documentation being provided to the Surveyors, an additional fee may be incurred by the Purchaser. Any additional fee will be agreed in writing.

If information is provided to the Surveyors during the conveyancing process which materially affects the valuation stated in the Report and generic Mortgage Valuation Report, the Surveyors reserve the right to reconsider the valuation. Where the Surveyors require to amend the valuation in consequence of such information, they will issue an amended Report and generic Mortgage Valuation Report to the Seller. It is the responsibility of the Seller to ensure that the amended Report and generic Mortgage Valuation Report are transmitted to every prospective Purchaser.

The individual Surveyor will be a member of the Royal Institution of Chartered Surveyors who is competent to survey, value and report upon Residential Property¹.

If the Surveyors have had a previous business relationship within the past two years with the Seller or Sellers Agent or relative to the property, they will be obliged to indicate this by ticking the adjacent box.

The Surveyors have a written complaints handling procedure. This is available from the offices of the Surveyors at the address stated.

1.2 THE REPORT

The Surveyors will not provide an amended Report on the Property, except to correct factual inaccuracies.

The Report will identify the nature and source of information relied upon in its preparation.

The Surveyor shall provide a Market Value of the Property, unless the condition of the Property is such that it would be inappropriate to do so. A final decision on whether a loan will be granted rests with the Lender who may impose retentions in line with their lending criteria. The date of condition and value of the property will be the date of inspection.

To date, Purchasers have normally obtained their own report from their chosen Surveyor. By contrast, a Single Survey is instructed by the Seller and made available to all potential Purchasers in the expectation that the successful Purchaser will have relied upon it. The Royal Institution of Chartered Surveyors rules require disclosure of any potential conflict of interest when acting for the Seller and the Purchaser in the same transaction. The Single Survey may give rise to a conflict of interest and if this is of concern to any party they are advised to seek their own independent advice.

¹ Which shall be in accordance with the current RICS Valuation Standards (The Red Book) and RICS Rules of Conduct.

The Report and any expressions or assessments in it are not intended as advice to the Seller or Purchaser or any other person in relation to an asking price or any other sales or marketing decisions. The Report is based solely on the Property and is not to be relied upon in any manner whatsoever when considering the valuation or condition of any other property.

If certain minor matters are mentioned in the Report it should not be assumed that the Property is free of other minor defects.

Neither the whole nor any part of the Report may be published in any way, reproduced or distributed by any party other than the Seller, prospective purchasers and the Purchaser and their respective professional advisers without the prior written consent of the Surveyors.

1.3 LIABILITY

The Report is prepared with the skill and care reasonably to be expected of a competent residential surveyor who is a member of the Royal Institution of Chartered Surveyors.

The Report is addressed to the Seller and was prepared in the expectation that it (or a complete copy) along with these Terms and Conditions (or a complete copy) would (or, as the case might be, would have been) be disclosed and delivered to:-

- the Seller;
- any person(s) noting an interest in purchasing the Property from the Seller;
- any person(s) who make(s) (or on whose behalf is made) an offer to purchase the Property, whether or not that offer is accepted by the Seller;
- the Purchaser; and
- the professional advisers of any of these.

The Surveyors acknowledge that their duty of skill and care in relation to the Report is owed to the Seller and to the Purchaser. The Surveyors accept no responsibility or liability whatsoever in relation to the Report to persons other than the Seller and the Purchaser. The Seller and Purchaser should be aware that if a Lender seeks to rely on this Report they do so at their own risk. In particular, the Surveyors accept no responsibility or liability whatsoever to any Lender in relation to the Report. Any such Lender relies upon the Report entirely at their own risk.

1.4 GENERIC MORTGAGE VALUATION REPORT

The Surveyors undertake to the Seller that they will prepare a generic Mortgage Valuation Report, which will be issued along with the Single Survey. It is the responsibility of the Seller to ensure that the generic Mortgage Valuation Report is provided to every potential Purchaser.

1.5 TRANSCRIPT MORTGAGE VALUATION FOR LENDING PURPOSES

The Surveyors undertake that on being asked to do so by a prospective purchaser, or his/her professional advisor or Lender, they will prepare a Transcript Mortgage Valuation Report for Lending Purposes on terms and conditions to be agreed between the Surveyors and Lender and solely for the use of the Lender and upon which the Lender may rely. The decision as to whether finance will be provided is entirely a matter for the Lender. The Transcript Mortgage Valuation Report ² will be from information contained in the Report and the generic Mortgage Valuation Report.

² Which shall be in accordance with the current RICS Valuation Standards (The Red Book) and RICS Rules of Conduct

1.6 INTELLECTUAL PROPERTY

All intellectual property rights whatsoever (including copyright) in and to the Report, excluding the headings and rubrics, are the exclusive property of the Surveyors and shall remain their exclusive property unless they assign the same to any other party in writing.

1.7 PAYMENT

The Surveyors are entitled to refrain from delivering the Report to anyone until the fee and other charges for it notified to the Seller have been paid. Additional fees will be charged for subsequent inspections and Reports.

1.8 CANCELLATION

The Seller will be entitled to cancel the inspection by notifying the Surveyor's office at any time before the day of the inspection.

The Surveyor will be entitled not to proceed with the inspection (and will so report promptly to the Seller) if after arriving at the property, the Surveyor concludes that it is of a type of construction of which the surveyor has insufficient specialist knowledge to be able to provide the inspection satisfactorily. The Surveyor will also be entitled not to proceed if after arriving at the property, the surveyor concludes that the property is exempt under Part 3 of The Housing (Scotland) Act 2006 as detailed in the (Prescribed Documents) Regulations 2008. If there is a potential threat to their health or personal safety, the inspection may be postponed or cancelled, at the Surveyor's discretion.

In the case of cancellation or the inspection not proceeding, the Surveyor will refund any fees paid by the Seller for the inspection and Report, except for expenses reasonably incurred and any fee due in light of the final paragraph of this section.

In the case of cancellation by the Seller, for whatever reason, after the inspection has taken place but before a written report is issued, the Surveyor will be entitled to raise an Invoice equivalent to 80% of the agreed fee.

1.9 PRECEDENCE

If there is any incompatibility between these Terms and Conditions and the Report, these Terms and Conditions take precedence.

1.10 DEFINITIONS

- the "Lender" is the party who has provided or intends or proposes to provide financial assistance to the Purchaser towards the purchase of the Property and in whose favour a standard security will be granted over the Property;
- the "Transcript Mortgage Valuation Report for Lending Purposes" means a separate report, prepared by the Surveyor, prepared from information in the Report and the generic Mortgage Valuation Report, but in a style and format required by the Lender. The Transcript Mortgage Valuation Report for Lending Purposes will be prepared with the skill and care reasonably to be expected from a surveyor who is a member of the Royal Institution of Chartered Surveyors and who is competent to survey, value and report on the Property;
- the "Generic Mortgage Valuation Report" means a separate report, prepared by the Surveyor from information in the Report but in the Surveyor's own format;

- the "Market Value" is the estimated amount for which a property should exchange on the date of valuation between a willing buyer and a willing seller in an arm's-length transaction after proper marketing wherein the parties had each acted knowledgeably, prudently and without compulsion;
- the "Property" is the property which forms the subject of the Report;
- the "Purchaser" is the person (or persons) who enters into a contract to buy the Property from the Seller:
- a "prospective Purchaser" is anyone considering buying the Property;
- the "Report" is the report, of the kind described in Part 2 of these Terms and Conditions and in the form set out in part 1 of Schedule 1 of the Housing (Scotland) Act 2006 (Prescribed Documents) Regulations 2008;
- the "Seller" is/are the proprietor(s) of the Property;
- the "Surveyor" is the author of the Report on the Property; and
- the "Surveyors" are the firm or company of which the Surveyor is an employee, director, member or partner (unless the Surveyor is not an employee, director, member or partner, when the "Surveyors" means the Surveyor) whose details are set out at the head of the Report.
- the "Energy Report" is the advice given by the accredited Energy Company, based on information collected by the Surveyor during the Inspection, and also includes an Energy Performance Certificate, in a Government approved format.

PART 2 - DESCRIPTION OF THE REPORT

2.1 THE SERVICE

The Single Survey is a Report by an independent Surveyor, prepared in an objective way regarding the condition and value of the Property on the day of the inspection, and who is a member of the Royal Institution of Chartered Surveyors. It includes an Energy Report as required by Statute and this is in the format of the accredited Energy Company. In addition, the Surveyor has agreed to supply a generic Mortgage Valuation Report.

2.2 THE INSPECTION

The Inspection is a general surface examination of those parts of the Property which are accessible: in other words, visible and readily available for examination from ground and floor levels, without risk of causing damage to the Property or injury to the Surveyor.

All references to visual inspection refer to an inspection from within the property at floor level and from ground level within the site and adjoining public areas, without the need to move any obstructions. Any references to left or right are taken facing the front of the property.

The Inspection is carried out with the Seller's permission, without causing damage to the building or contents. Furniture, stored items and insulation are not moved.

Unless identified in the report the Surveyor will assume that no harmful or hazardous materials have been used in the construction. The presence or possible consequences of any site contamination will not be researched.

The Surveyor will not carry out an asbestos inspection, and will not be acting as an asbestos inspector in completing a Single Survey of properties that may fall within the Control of Asbestos in the Workplace Regulations. In the case of flats it will be assumed that there is a duty holder, as defined in the Regulations and that a Register of Asbestos and effective Management Plan is in place, which does not require any expenditure, or pose a significant risk to health. No enquiry of the duty holder will be made.

2.3 THE REPORT

The Report will be prepared by the Surveyor who carried out the property inspection and will describe various aspects of the property as defined by the headings of the Single Survey report with the comments being general and unbiased. The report on the location, style and condition of the property, will be concise and will be restricted to matters that could have a material effect upon value and will omit items that, in the Surveyor's opinion, are not significant. If certain minor matters are mentioned, it should not be interpreted that the property is free of any other minor defects.

Throughout the report, the following repair categories will be used to give an overall opinion of the state of repair and condition of the property.

- Category 3: Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.
- 2. Category 2: Repairs or replacement requiring future attention, but estimates are still advised.
- 3. Category 1: No immediate action or repair is needed.

WARNING:

If left unattended, even for a relatively short period, Category 2 repairs can rapidly develop into more serious Category 3 repairs. The existence of Category 2 or Category 3 repairs may have an adverse effect on marketability, value and the sale price ultimately achieved for the property. This is particularly true during slow market conditions when the effect can be considerable.

Parts of the property, which cannot be seen or accessed, will not be reported upon and this will be stated. If the Surveyor suspects that a defect may exist within an unexposed area and which could have a material effect upon the value, he may recommend further investigation by specialist contractors.

2.4 SERVICES

Surveyors are not equipped or qualified to test the services and therefore no comment can be interpreted as implying that the design, installation and function of the services are in accordance/compliance with regulations, safety and efficiency expectations. However, comment is made where there is cause to suspect significant defects or shortcomings with the installations. No tests are made of any services or appliances.

2.5 ACCESSIBILITY

A section is included to help identify the basic information interested parties need to know to decide whether to view a property.

2.6 ENERGY REPORT

A section is included that makes provision for an Energy Report, relative to the property. The Surveyor will collect physical data from the property and provide such data in a format required by an accredited Energy Company. The Surveyor cannot of course accept liability for any advice given by the Energy Company.

2.7 VALUATION AND CONVEYANCER ISSUES

The last section of the Report contains matters considered relevant to the Conveyancer (Solicitor). It also contains the Surveyor's opinion both of the market value of the property and of the re-instatement cost, as defined below.

"Market Value" is the estimated amount for which a property should exchange on the date of valuation between a willing buyer and a willing seller in an arm's-length transaction after proper marketing wherein the parties had each acted knowledgeably, prudently and without compulsion. In arriving at the opinion of the Market Value, the Surveyor also makes various standard assumptions covering, for example, vacant possession; tenure and other legal considerations; contamination and hazardous materials; the condition of un-inspected parts; the right to use mains services; and the exclusion of curtains, carpets etc. from the valuation. In the case of flats, the following further assumptions are made that:

- There are rights of access and exit over all communal roadways, corridors, stairways etc. and to use communal grounds, parking areas, and other facilities;
- There are no particularly troublesome or unusual legal restrictions;
- There is no current dispute between the occupiers of the flats or any outstanding claims or losses; and the costs of repairs to the building are shared among the co-proprietors on an equitable basis.

Any additional assumption, or any found not to apply, is reported.

"Re-instatement cost" is an estimate for insurance purposes of the current cost of rebuilding the Property in its present form unless otherwise stated. This includes the cost of rebuilding the garage and permanent outbuildings, site clearance and professional fees, but excludes VAT (except on the fees).

Sellers or prospective Purchasers may consider it prudent to instruct a reinspection and revaluation after a period of 12 weeks (or sooner if appropriate) to reflect changing circumstances in the market and/or in the physical condition of the Property.

1. Information and scope of inspection

This section tells you about the type, accommodation, neighbourhood, age and construction of the property. It also tells you about the extent of the inspection and highlights anything that the surveyor could not inspect.

All references to visual inspection refer to an inspection from within the property without moving any obstructions and externally from ground level within the site and adjoining public areas. Any references to left or right in a description of the exterior of the property refer to the view of someone standing facing that part of the property from the outside.

The inspection is carried out without causing damage to the building or its contents and without endangering the occupiers or the surveyor. Heavy furniture, stored items and insulation are not moved. Unless identified in the report the surveyor will assume that no harmful or hazardous materials or techniques have been used in the construction. The presence or possible consequences of any site contamination will not be researched.

Services such as TV/cable connection, internet connection, swimming pools and other leisure facilities etc. will not be inspected or reported on.

Description	The subjects comprise a two storey detached house.
Accommodation	Ground Floor: Entrance vestibule, sitting room, dining room, living room, sun room, kitchen/breakfast room, wet room and utility room. First Floor: Principal bedroom with en-suite shower room, three further bedrooms and family bathroom.
Gross internal floor area (m²)	183 m2 approx.
Neighbourhood and location	The subjects are situated within an established residential area of mixed style properties lying within the Colinton area of Edinburgh and convenient for local shopping, educational and social facilities.
Age	1960 approx.
Weather	Dry and sunny.
Chimney stacks	Visually inspected with the aid of binoculars where appropriate. Rendered masonry type chimney stacks present.
Roofing including roof space	Sloping roofs were visually inspected with the aid of binoculars where appropriate. Flat roofs were visually inspected from vantage points within the property and where safe and reasonable to do so from a 3m ladder externally. Roof spaces were visually inspected and were entered where there was safe and reasonable access, normally defined as being from a 3m ladder within the property. If this is not possible, then physical access to the roof space

	may be taken by other means if the Surveyor deems it safe and reasonable to do so.	
	The roof is pitched and tiled with flat sections clad with waterproof membrane.	
Rainwater fittings	Visually inspected with the aid of binoculars where appropriate.	
	Traditional gutters and downpipes.	
Main walls	Visually inspected with the aid of binoculars where appropriate.	
	Foundations and concealed parts were not exposed or inspected.	
	The main walls are built of traditional cavity brickwork with render, pointed masonry and UPVC external cladding finishes.	
Windows, external doors and joinery	Internal and external doors were opened and closed where keys were available.	
	Random windows were opened and closed where possible.	
	Doors and windows were not forced open.	
	The windows throughout are of a mixed type with both timber single glazed type units, cast iron single glazed type units, UPVC double glazed type units and velux windows. The front access door is of a UPVC type. The rear access door is of a timber variety. Timber fascia boards are present. Asbestos type soffit boards are present.	
External decorations	Visually inspected.	
	UPVC and paint finishes.	
Conservatories / porches	Visually inspected.	
•	The property benefits from a sun room located to the rear elevation.	
Communal areas	None.	
Garages and permanent outbuildings	Visually inspected.	
	The property benefits from a double car garage.	

Visually inspected.	
The property benefits from garden grounds to the front and rear elevations. A driveway is present to the front elevation. The boundaries are of a mixed type.	
Visually inspected from floor level.	
Plaster and textured coatings noted. Timber lining present. A UPVC ceiling is present within the wet room at ground floor level.	
Visually inspected from floor level.	
Using a moisture meter, walls were randomly tested for dampness where considered appropriate.	
Plaster, vinyl and textured coatings noted. Timber lining present.	
Surfaces of exposed floors were visually inspected. No carpets or floor coverings were lifted.	
The floors throughout have fitted floor coverings.	
Built-in cupboards were looked into but no stored items were moved.	
Kitchen units were visually inspected excluding appliances.	
The kitchen/utility fittings are of a dated type. The internal doors, skirtings and facings appear to be of a timber variety.	
Visually inspected.	
No testing of the flues or fittings was carried out.	
The fireplaces appear to have been blocked over.	
Visually inspected.	
Papered and painted throughout.	
Visually inspected where there was a safe and purpose-built access.	
None.	
Accessible parts of the wiring were visually inspected without removing fittings. No tests whatsoever were carried out to the system or appliances. Visual inspection does not assess any services to make sure they work properly and efficiently and meet modern standards. If any services are turned off, the surveyor will state that in the report and will not turn them on. Mains supply with the fuseboards located in the under stair	

	cupboard.
	03,500.31
Gas	Accessible parts of the system were visually inspected without removing fittings. No tests whatsoever were carried out to the system or appliances. Visual inspection does not assess any services to make sure they work properly and efficiently and meet modern standards. If any services are turned off, the surveyor will state that in the report and will not turn them on. Mains supply with the gas meter located externally.
Water, plumbing, bathroom fittings	Visual inspection of the accessible pipework, water tanks,
water, plumbing, bathroom mungs	cylinders and fittings without removing any insulation.
	No tests whatsoever were carried out to the system or appliances.
	Water is from the mains supply. The plumbing, where seen, is of copper supply pipes and PVC waste pipes. The sanitary fittings are located within the en-suite shower room, family bathroom and wet room.
Heating and hot water	Accessible parts of the system were visually inspected apart from communal systems, which were not inspected.
	No tests whatsoever were carried out to the system or appliances.
	The property benefits from a gas fired central heating system with the gas boiler located within the utility room. The property benefits from a hot water system. A hot tank is located within the first floor shower room cupboard. An electric fire is present in the living room.
Drainage	Drainage covers etc. were not lifted.
	Neither drains nor drainage systems were tested.
	Presumed to main public sewer
Fire, smoke and burglar alarms	Visually inspected.
The, smoke and sargial dialins	No tests whatsoever were carried out to the system or appliances.
	All Scottish homes require a smoke alarm to be installed in the room most frequently used for living purposes and in every circulation space on each floor. A heat alarm also needs to be installed in each kitchen. The alarms need to be ceiling mounted and interlinked. Where there is a carbon-fuelled appliance such as a boiler, open fire or wood burner, a carbon monoxide detector is also required. We have not assessed or tested any existing equipment and it is the purchasers responsibility to confirm that the property will comply with these standards following a change of ownership.
	The property benefits from a burglar alarm, however, this may not be operational and should be confirmed with the vendor prior to

purchase.

Any additional limits to inspection

For flats / maisonettes

Only the subject flat and internal communal areas giving access to the flat were inspected.

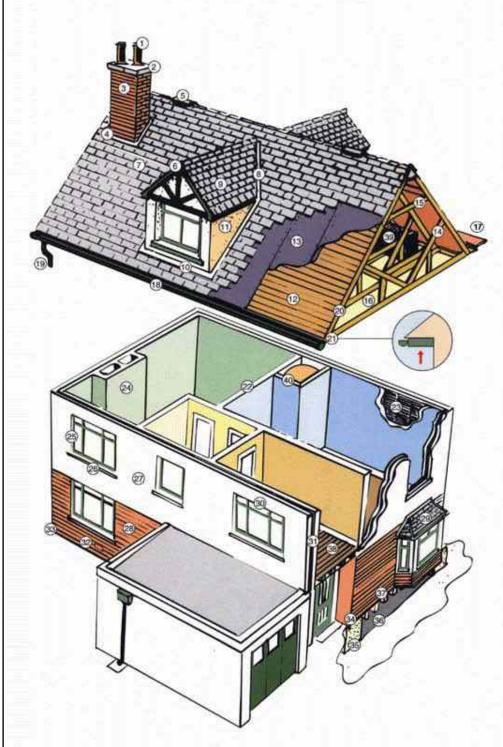

If the roof space or under-building / basement is communal, reasonable and safe access is not always possible. If no inspection was possible, this will be stated. If no inspection was possible, the surveyor will assume that there are no defects that will have a material effect on the valuation.

The building containing the flat, including any external communal areas, was visually inspected only to the extent that the surveyor is able to give an opinion on the general condition and standard of maintenance.

The property was fully floor covered/furnished at the time of inspection. The property was full of possessions at the time of inspection. The cupboards were full of possessions at the time of inspection. No access was gained to any sub floor areas. No access was gained to the area below the sanitary fittings. Limited access was gained to the eaves void. Sections of the flat roof and tiled roof were unseen due to the position of the dwelling. The roof decks and sections of the tiled roof were seen from ground floor level only. The services were not tested. The heating system was not tested. The garage was full of possessions at the time of inspection.

An inspection for Japanese Knotweed was not carried out. This is a plant which is subject to control regulation, is considered to be invasive and one which can render a property unsuitable for some mortgage lenders. It is therefore assumed that there is no Japanese Knotweed within the boundaries of the property or its neighbouring property. Identification of Japanese Knotweed is best undertaken by a specialist contractor.

2. Condition

This section identifies problems and tells you about the urgency of any repairs by using one of the following three categories:

Category 3	Category 2	Category 1
	Repairs or replacement requiring future attention, but estimates are still advised.	

Structural movement	
Repair category	1
Notes	Cracking noted to a number of the walls and ceilings within the subject property and cracking was noted to the external walls. For the purposes of this report, we presume this movement is of a longstanding and non progressive nature, however, no guarantee can be given with the limitations of a single visual inspection.

Dampness, rot and infestation	
Repair category	2
Notes	Damp staining noted to the walls and ceilings at both ground and first floor level and leakage has occurred to the wall within the en-suite shower room. Condensation was noted to the shower room ceiling. We would recommend a full precautionary check be carried out by a timber/damp specialist contractor prior to purchase and thereafter estimates obtained for all necessary remedial works including exposure works.

Chimney stacks	
Repair category	2
Notes	Weathering noted to the chimney stacks. Remedial works required.

Roofing including roof space	
Repair category	2
Notes	Weathering and moss growth noted to the roof tiles. The flat roof decks, where seen, are dated. Leakage has occurred to the ceilings and the walls at first floor level. Remedial works are required to the roof and as such recommend that a suitable roofing contractor carry out a thorough inspection of the roof decks and roof void prior to purchase and provide written estimates for all necessary remedial works.

Rainwater fittings	
Repair category	2
Notes	Weathering has occurred to the rainwater goods. Remedial works required including repairs to adjacent areas if necessary. All rainwater goods should be monitored under wet weather conditions.

Main walls	
Repair category	2
Notes	Weathering and cracking has occurred to the external walls, in particular the render and pointed masonry finishes. Weathering has occurred to the external access steps. Remedial works are required by a suitable contractor. It appears that cavity wall insulation has been installed and this should be confirmed with the vendor. The external tap to the rear elevation is leaking and will require attention.

Windows, external doors and joinery	
Repair category	2
Notes	The windows ,external cladding and external doors are dated and require a full upgrade including the velux windows and any failed double glazed units replaced. The timber fascia boards require attention. All necessary precautions should be taken in respect of the asbestos type soffit boards.

External decorations	
Repair category	2
Notes	Defective external finishes noted. Remedial works required.

Conservatories/porches	
Repair category	2
Notes	The garden room is dated and as such requires upgrading and should be monitored under wet weather conditions.

Communal areas	
Repair category	-
Notes	None.

Garages and permanent outbuildings	
Repair category	2
Notes	Dampness noted to the walls in the garage. Timber decay noted to the garage door frames. Remedial works required to the garage. The flat roof decks to the garage is dated and will require to be checked bythe roofing contractor at the time of inspection.

Outside areas and boundaries	
Repair category	2
Notes	The boundaries require attention. The slabbed areas/driveway require attention. The trees within the garden will require to be maintained.

Ceilings	
Repair category	2
Notes	Plaster defects noted. Remedial works required. We presume the timber lining has been treated with a flame retardant material. Textured coatings were noted and we have presumed these do not contain any hazardous type materials and this should be confirmed prior to purchase.

Internal walls	
Repair category	2
Notes	Plaster defects noted. Remedial works required. We presume the timber lining has been treated with a flame retardant material. Textured coatings were noted and we have presumed these do not contain any hazardous type materials and this should be confirmed prior to purchase.

Floors including sub-floors	
Repair category	2
Notes	Defective flooring noted. Remedial works required.

Internal joinery and kitchen fittings	
Repair category	2
Notes	The kitchen and utility room fittings require to be upgraded. The internal doors, skirtings and facings require to be upgraded. We recommend that safety glass be installed to internal areas.

Chimney breasts and fireplaces	
Repair category	1
Notes	Prior to use any fireplace, flue or chimney should be checked and made good by a suitable contractor.

Internal decorations	
Repair category	2
Notes	The internal decoration is dated requires to be upgraded by a suitable contractor.

Cellars	
Repair category	-
Notes	None.

Electricity	
Repair category	2
Notes	The electrical wiring system is of a dated type with a number of sockets not having on/off switches. Upgrading is now required to the electrical wiring system and this should be carried out by a suitable electrical contractor. No tests were carried out by this firm.

Gas	
Repair category	1
Notes	We presume the gas supply is free of defects, however, the system has not been tested.

Water, plumbing and bathroom fittings	
Repair category	2
Notes	The sanitary fittings require upgraded. We would recommend that the sealants around the sanitary fittings be upgraded and the adjacent areas checked and made good as necessary prior to purchase as these areas are prone to leakage and it appears that timber decay has occurred to the areas around the sanitary fittings. We would recommend the disconnected galvanised cold water storage tank be removed from the roof void area.

Heating and hot water	
Repair category	2
Notes	We would recommend a precautionary check be carried of the gas fired central heating system and hot water system by a suitable contractor in accordance with good practice. The radiators are dated and will require to be upgraded. No tests were carried out by this firm.

Drainage	
Repair category	1
Notes	We presume the drainage system is free of defects, however, the system has not been tested.

Set out below is a summary of the condition of the property which is provided for reference only. You should refer to the previous comments for detailed information.

Structural movement	1
Dampness, rot and infestation	2
Chimney stacks	2

Gas	1
Water, plumbing and bathroom fittings	2
Heating and hot water	2
Drainage	1

Category 3

Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.

Category 2

Repairs or replacement requiring future attention, but estimates are still advised.

Category 1

No immediate action or repair is needed.

Remember

The cost of repairs may influence the amount someone is prepared to pay for the property. We recommend that relevant estimates and reports are obtained in your own name.

Warning

If left unattended, even for a relatively short period, Category 2 repairs can rapidly develop into more serious Category 3 repairs. The existence of Category 2 or Category 3 repairs may have an adverse effect on marketability, value and the sale price ultimately achieved for the property. This is particularly true during slow market conditions where the effect can be considerable.

3. Accessibility information

Guidance notes on accessibility information

Three steps or fewer to a main entrance door of the property:

In flatted developments the 'main entrance' would be the flat's own entrance door, not the external door to the communal stair. The 'three steps or fewer' are counted from external ground level to the flat's entrance door. Where a lift is present, the count is based on the number of steps climbed when using the lift.

Unrestricted parking within 25 metres:

For this purpose, 'Unrestricted parking' includes parking available by means of a parking permit. Restricted parking includes parking that is subject to parking restrictions, as indicated by the presence of solid yellow, red or white lines at the edge of the road or by a parking control sign, parking meters or other coin-operated machines.

1. Which floor(s) is the living accommodation on?	Ground and First
2. Are there three steps or fewer to a main entrance door of the property?	Yes No X
3. Is there a lift to the main entrance door of the property?	Yes No X
4. Are all door openings greater than 750mm?	Yes No X
5. Is there a toilet on the same level as the living room and kitchen?	Yes X No
6. Is there a toilet on the same level as a bedroom?	Yes X No
7. Are all rooms on the same level with no internal steps or stairs?	Yes No X
8. Is there unrestricted parking within 25 metres of an entrance door to the building?	Yes X No

4. Valuation and conveyancer issues

This section highlights information that should be checked with a solicitor or licensed conveyancer. It also gives an opinion of market value and an estimated reinstatement cost for insurance purposes.

Matters for a solicitor or licensed conveyancer

It is presumed all documentation is available for alterations and extensions to the subject property to form the present accommodation including the additional garage, wet room, rear extension, gable extension, sun room, principal bedroom with en-suite shower room together with the installation of replacement windows.

Where areas of maintenance, defects or repairs have been identified within this report it is recommended that, prior to entering into any legally binding sale or purchase contract, further specialists or contractors advice and estimates should be obtained, to establish the implications, if any, on a potential offer to purchase or the sale price likely to be achieved for the property.

Estimated reinstatement cost for insurance purposes

For Reinstatement Cost Assessment purposes, it is recommended that the subjects be insured for a sum of not less than £700,000 (Seven Hundred Thousand Pounds Sterling). This figure is the estimate of the cost of rebuilding the premises and bears no direct relationship to current market value.

Valuation and market comments

Having considered matters, taking account of our general observations on site, we are of the opinion that the Market Value of the subjects in their present condition and with the benefit of vacant possession may be fairly stated in the sum of £600,000 (Six Hundred Thousand Pounds Sterling).

Market conditions are steady at the present time.

General Remarks

At the time of inspection the property was found to require upgrading and the following observations were made:-

1. It is presumed all documentation is available for alterations and extensions to the subject property to form the present accommodation including the additional garage, wet room, rear extension, gable extension, sun room, principal bedroom with en-suite shower room together with the installation of replacement windows. 2. Structural movement was noted to the subject property. For the purposes of this report, we presume this movement is of a longstanding and non progressive nature, however, no guarantee can be given with the limitations of a single visual inspection. 3. Repairs are required to the external fabric in particular the main walls, roof, chimneys and rainwater goods. 4. The windows and external doors require to be upgraded. 5. The garages require to be upgraded. 6. The electrical wiring system is of a dated type with a number of sockets not having on/off switches. Upgrading is now required to the electrical wiring system and this should be carried out by a suitable contractor. 7. Upgrading required to the internal fabric. 8. Damp staining noted to the walls and ceilings at both ground and first floor level and leakage has occurred to the wall within the en-suite shower room. Condensation was noted to the shower bathroom ceiling. We would recommend a full precautionary check be carried out by a timber/damp specialist contractor prior to purchase and thereafter estimates obtained for all necessary remedial works including exposure works.

The roof is pitched and tiled with flat sections clad with waterproof membrane.

The property benefits from a utility room and sun room.

Property Questionnaire

SHEPHERD property questionnaire

Property address	27 Bonaly Gardens Edinburgh EH13 0EX		
	The Mayor of Attorney		
Seller(s)	Dennis B Seatter (Power of Attorney Denise Cannon on his behalf)		
Completion date of property questionnaire	11/08/2025		

Note for sellers

- Please complete this form carefully. It is important that your answers are correct.
- The information in your answers will help ensure that the sale of your house goes smoothly. Please answer each question with as much detailed information as you can.
- If anything changes after you fill in this questionnaire but before the date of entry for the sale of your house, tell your solicitor or estate agent immediately.

Information to be given to prospective buyer(s)

1.	Length of ownership		
	How long have you owned the proper	ty? 37 years	
2.	Council tax		
	Which Council Tax band is your prope	erty in? (Please tick one)	
3.	Parking		
	What are the arrangements for parking (Please tick all that apply)	ng at your property?	
	• Garage		
	Allocated parking space		
	• Driveway	\boxtimes	
	Shared parking		
	On street		
	Resident permit		
	Metered parking		
	Other (please specify):		
4.	Conservation area		
	Is your property in a designated Conservation Area (that is an area of special architectural or historical interest, the character or appearance of which it is desirable to preserve or enhance)?		☐ Yes ☑ No ☐ Don't know

5.	Listed buildings				
	Is your property a Listed Building, or contained within one (that is a building recognised and approved as being of special architectural or historical interest)?	☐ Yes ⊠ No			
6.	Alterations/additions/extensions				
а.	(i) During your time in the property, have you carried out any structural alterations, additions or extensions (for example, provision of an extra bath/shower room, toilet, or bedroom)?	⊠ Yes □ No			
	If you have answered yes, please describe below the changes which
